## SUBJECT : MATHS

APRIL - JUNE			
Chapter	Activities	Value Inculcate	Learning Outcomes
Ch-2: Lines and Angles	<ul style="list-style-type: none"> <li>Forming angles using a grid isometric sheet.</li> </ul>	Measurement and estimation, classification and categorisation, Observation skills, Fine motor skills for drawings, Critical thinking and problem solving.	Identify and draw geometric concepts like points, lines, segments, rays, and angles; apply the concepts of angles in real-life situations.
Ch-5: Prime Time	<ul style="list-style-type: none"> <li>Make 10x10 grid of eratosthenes sieves and find prime numbers, composite numbers and even, odd numbers up to 100 using sieves method</li> </ul>	Logical reasoning Problem solving Critical thinking Collaborative learning Numerical computation	Understand and identify prime and composite numbers, Find factors and multiples of numbers, Apply prime factorization to solve real-life problems
Ch-3: Number Play	<ul style="list-style-type: none"> <li>Take 4 different digits from your birth date and teach the KAPREKAR instant</li> </ul>	Pattern recognition and analysis Mental arithmetic and estimation Computational thinking and logical reasoning	Recognize and create number patterns Developed strategies for mathematical games Apply computational thinking and logical reasoning to real life problems
JULY - AUGUST			
Ch-7: Fractions	<ul style="list-style-type: none"> <li>Make any five regular polygons using matchsticks on an A4 sheet</li> </ul>	Visual Representation Problem Solving	Add and subtract fractions using brahmagupta method Understand fractions, identify and generate equivalent fractions.
Ch-1: Patterns in Mathematics	<ul style="list-style-type: none"> <li>Prepare fraction board by paper cutting and pasting</li> </ul>	Pattern recognition and extension Critical thinking	Identify and extend patterns in shape and numbers. Relate shape sequence to number sequence. Understand and explain the formation of different number sequence.

Ch-4: Data Handling and Presentation	<ul style="list-style-type: none"> <li>Bar graph (treasure hunt): Collect data of seven highest peaks of seven continents and create a bar graph of the collected data.</li> </ul>	Aesthetic sense will be developed Creativity and enhanced Visual representation of data	Represent data using photographs and bar graphs Understand the importance of aesthetic consideration in data presentation
<b>OCTOBER - DECEMBER</b>			
Ch-6: Perimeter and Area	<ul style="list-style-type: none"> <li>Arrange 7 pieces of tangrams (given at back of textbook) in the form of rectangle and find the area and perimeter of the rectangle. Compare the perimeter of square and rectangle formed from these seven pieces.</li> </ul>	Spatial reasoning Measurement and estimation Application of concept to real-life situations	Calculate perimeter of rectangles, squares, and triangles. Understand the relationship between area of a rectangle and a triangle. Estimate area of irregular shapes using grid method.
Ch-10: Other Side of Zero	<ul style="list-style-type: none"> <li>Make snakes and ladders game for integers</li> </ul>	Abstract thinking Problem solving and mathematical communication	Understand and represent positive and negative integers Perform addition and subtraction on integers Apply the concept to real-life situations (e.g., temperature, transactions, etc.)
Ch-9: Symmetry	<ul style="list-style-type: none"> <li>Draw colourful Rangoli (using line of symmetry)</li> <li>Make pinwheel for showing rotational symmetry</li> </ul>	Analytical thinking and creative problem solving Pattern recognition	Identify and draw line of symmetry in various shapes Recognize and create figures with rotational symmetry
<b>JANUARY - MARCH</b>			
Ch-8: Playing with Construction	<ul style="list-style-type: none"> <li>Create or construct artistic big house using compass and ruler (based on points equidistant from two given points)</li> </ul>	Precision in measurement and drawing Logical thinking and problem solving Understanding and applying geometric properties	Construct squares and rectangles given side lengths Find points equidistant from two given points Apply construction techniques to create artistic designs

**Important Note:** The following chapters of Term 1 will be repeated in Term 2:

Ch.1 Patterns

Ch.4 Data Handling and Presentation

Ch.7 Fractions

## SUBJECT : SCIENCE

<b>Term-I</b> <span style="float: right;"><b>APRIL</b></span>			
<b>Topic</b>	<b>Activities</b>	<b>Value / Skill</b>	<b>Learning Outcomes</b>
Elements	To make a chart of elements (1 to 15)	Observation Analytical Thinking Artistic	Knowledge about writing chemical elements
Ch-1 The Wonderful World of Science	To make a chart on underwater view of an ocean	Artistic Aesthetic Analytical Thinking	Observing and doing things to understand the world we live in
Ch-2 Diversity in the Living World	Draw diagrams of dicot seed, monocot seed, parallel and reticulate venation	Art Integrated Real Life Application	Understand the importance of nature, different plants and animals
<b>MAY</b>			
Ch-3- Mindful Eating : A Path to Healthy Body	To make a chart of vitamins and minerals, their functions, some sources, related deficiency diseases and symptoms	Analytic Application Creativity	Understand the importance of balanced diet, about deficiency diseases and symptoms
<b>JULY</b>			
Ch-4 Exploring Magnets	Model of two matchbox magnet cars with like poles of magnets facing each other	Psychomotor Domain Utilitarian Critical Thinking Reasoning	Awareness about magnetic and non magnetic materials, attraction and repulsion between magnets
Ch-5 Measurement of Length and Motion	To measure the length of a curved line. Collage of types of motion	Critical Thinking Observation	Differentiate types of measurement
<b>AUGUST</b>			
Ch-6 Materials around us	Group the different objects around and classified on the basis of different materials	Art Integration Critical Thinking	Understanding the different properties of materials and classify them
Ch-7 Temperature and its measurement	To measure temperature by clinical thermometer and laboratory thermometer	Real Life Application Creativity	Understanding the different types of thermometer and scales

<b>SEPTEMBER</b>			
<b>Revision And Mid Term Exam , Syllabus : Lesson : 1 To 7 , Chemical Elements</b>			
<b>Term-II</b>	<b>OCTOBER</b>		
Ch-8 A journey through states of water	A chart of water cycle depicting various processes involved	Aesthetic Artistic Reasoning Thinking and creativity	Understanding the different states of matter and learn about the process of water cycle
Ch-9 Methods of separation in everyday life	Chart on methods of separation; Handpicking, Threshing, Winnowing	Hands on Experience	Understanding the different methods of separation used in everyday life
<b>NOVEMBER</b>			
Ch-10 Living creatures : Exploring their characteristics	Sprout making activity Diagram of life cycle of mosquito	Real Life Application Artistic	Knowledge about growth and movement in plants Understanding the life cycle of plants and animals
<b>DECEMBER</b>			
Ch-11 Nature's Treasures	To make firki	Global Awareness Environmental Awareness	Understanding the importance of air, water, sun, forests and fossil fuels
<b>JANUARY</b>			
Ch-12 Beyond Earth	Model of solar system	Environmental Awareness Scientific Approach	Understanding about stars and constellations
<b>FEBRUARY</b>			
<b>REVISION AND FINAL EXAM</b>			
<b>SYLLABUS : Lesson 8 To 12, Chemical Elements, Chapter 3: Mindful Eating : A Path To Healthy Body, Chapter 6: Materials Around Us, Chapter 7: Temperature and Its Measurement</b>			

## SUBJECT : SOCIAL SCIENCE

**Book: Exploring Society India and Beyond**

Term-I <span style="float: right; color: red;">APRIL</span>			
Chapter	Activities	Value / Skill	Learning Objectives
